

Where Do I Find the Information I Need?	Administrator Guide	Expansion Guide	Grid Designer User Guide	Grid Primer	Installation Guide	Maintenance Guide	StorageGRID API Reference	Troubleshooting Guide	Upgrade Guide
Admin Node, converting to HCAC		✓							
Alarms, configuring and disabling	✓								
Alarms, list of pre-configured								✓	
Archive Node, using TSM server	✓				✓				
Audit feed, enabling and configuring							✓		
CA certificate, locating in NMS MI (for copying)							✓		
CIFS file share, configuring	✓								
CMN, operating without						✓			
Control Nodes, converting to metadata replication						✓			
Control Nodes, enabling object location indexing						✓			
Data Recovery Tool, for disaster recovery						✓			
Data recovery, recovering data after a disastrous failure						✓			
Deprecated features, list of									✓
Direct-attached storage, mounting	✓								
Direct-attached storage, recovering						✓			
Direct-attached storage, adding volumes		✓							
DNS, configuring	✓								
Error codes, list of								✓	
File recovery, protecting original file version	✓								
File shares, configuring	✓								
File system backup, forcing a						✓			
File system, recovering from backup									
File, replicating						✓			
FSG cache, configuring	✓								
FSG cache, copying						✓			
FSG file system, recovering						✓			
FSG profiles, creating and modifying	✓								
Gateway Node group, converting to an HGAC									
Gateway Node, performing a failover						✓			
GDU, using		✓			✓	✓			✓
Grid Node, adding a new		✓							
Grid Node, recovering a failed						✓			
Grid operations, monitoring				✓					

Where Do I Find the Information I Need?	Administrator Guide	Expansion Guide	Grid Designer User Guide	Grid Primer	Installation Guide	Maintenance Guide	StorageGRID API Reference	Troubleshooting Guide	Upgrade Guide
Grid tasks, running	✓								
Grid Topology Tree, moving grid nodes within NMS MI	✓								
Grid topology, changing the location of Grid Nodes			✓						
HAGC, converting to		✓							
Hardware refresh, performing		✓							
HCAC, converting to		✓							
Hostname, changing for a server	✓								
Hotfixes, applying		✓							
HTTP connections, configuring grid to accept							✓		
ILM rules, creating and modifying	✓								
IP addresses, changing (client or grid node)	✓								
IP addresses, configuring	✓								
LDR and storage, configuring	✓								
Log files, list of								✓	
Maintenance releases, applying		✓							
Metadata Control Nodes, converting to metadata replication						✓			
Monitoring the grid				✓					
Networks, configuring (ssh, NTP, DNS, SNMP, IP)	✓								
New features, list of									✓
NFS file share, configuring	✓								
NICs, reordering					✓	✓			
NMS entity name, changing	✓								
NTP, configuring	✓								
Obsolete features, list of									✓
Operating system (SLES), updating									✓
Physical servers, preparing						✓			
Ports, required for the grid network					✓				
Reports, creating				✓					
Security partitions, configuring							✓		
Server Manager, using	✓								
Service pack, applying									✓
SNMP monitoring, configuring	✓								
SNMP, configuring	✓								

Where Do I Find the Information I Need?	Administrator Guide	Expansion Guide	Grid Designer User Guide	Grid Primer	Installation Guide	Maintenance Guide	StorageGRID API Reference	Troubleshooting Guide	Upgrade Guide
ssh, configuring	✓								
Storage Node, decommissioning						✓			
Storage, adding		✓							
Storage, recovering failed volumes						✓			
TSM server, integrating with Archive Node	✓				✓				
Virtual machines, preparing		✓			✓	✓
